MEMORANDUM FOR THE RECORD

SUBJECT: DDCI's Briefing of Senate Select Committee
on Intelligence, 23 September 1976

85AT 1. Chairman Inouye opened the briefing of terrorism presented by the DDCI on 23 September. Senators Hathaway, Huddleston and Garn arrived shortly after the briefing began. Mr. William Miller, Mr. Michael Madigan, Mr. Rick Inderfurth, and other members of the staff were also present. (See attached listing.) Mr. Shackley and [redacted] appeared with Mr. Knoche.

2. Before the briefing began Senator Inouye asked Mr. Knoche to comment on the 21 September assassination of the former Chilean Ambassador, Mr. Letelier and on CIA relations with the Chilean Security Service (DINA). Mr. Knoche said that the Agency has no intelligence to indicate DINA or any other element of the Chilean Government was involved in the assassination. Senator Inouye was also advised that CIA is working closely with the FBI in the ongoing investigation of Mr. Letelier's death. The point was made that the jurisdictional responsibility for the Letelier case was with the FBI, but CIA was answering the FBI's questions about DINA and the situation in Chile.

3. Mr. Knoche then began the formal briefing on international terrorism and the CIA response to this challenge. Mr. Knoche had covered through page 12 of the attached draft when the briefing was recessed so that the Senators could participate in a roll call vote.
