FOREWORD

This publication supersedes CIA/RR A.GRA 64-1, Revised, May 1964, copies of which should be destroyed.

This list provides information on the availability of plans of selected cities in the USSR, Communist China, Mongolia, and North Vietnam. It includes city plans that have been published, are in compilation, or are planned, as well as supplementary information on the classification, scale, authority, CIA map number or Map Library accession number, and publication date or production status of each plan. Most of these city plans were published during the past 6 years

25X1X4

[REDACTED] but a few others that are suitable for use in the project have been included. In most cases the published plans that are included in this list provide the best coverage available for intelligence purposes. Users of the list are cautioned, however, that it is not to be considered all-inclusive; additional coverage may be available from any of the several map repositories in the Intelligence Community.

The published plans are available from the Central Intelligence Agency Map Library, Reference Branch, Code 143, Extension 2688. All field components of the Department of Defense should forward requests through liaison channels. Retention copies of plans printed by CIA can usually be provided to requesters. One map, VOLGOGRAD, numbered

25X1X7

[REDACTED] is available. Plans printed by CIA are identified on the list by a 5-digit number or a 5-digit number followed by a decimal. Plans identified by a 6-digit number are not printed by the Central Intelligence Agency and are available on loan only. Information on the availability of plans that are partly completed or that have been suspended will be supplied by the CIA Map Library upon request.
