ECONOMIC INTELLIGENCE STATISTICAL HANDBOOK

CIA/RR RA-12-R3

NOTICE

This compilation was prepared primarily for use in ORR and is not a formal ORR publication. Data for the Sino-Soviet Bloc are the best estimates of ORR as of 1 May 1959.

CENTRAL INTELLIGENCE AGENCY
Office of Research and Reports

SECRET

FOREWORD

1. Objectives and Scope.

The *Economic Intelligence Statistical Handbook*, 1959, is a tabular and graphical presentation of economic factors helpful in comparing and analyzing the economies of the countries of the Sino-Soviet Bloc* with the economies of the countries of the North Atlantic Treaty Organization (NATO).**

The 1959 *Handbook* consists of data on inventories and production for the years 1938, 1950, and 1955-58 for those commodities considered most important as measures of economic development. For the more important commodities, data for 1946 also are included. Certain of the more important commodities also are presented graphically both on semilogarithmic graphs and on bar charts: semilogarithmic graphs for data for 1950-58 and for planned data for 1965 and bar charts for data for 1950 and 1956-58. Summary tables covering major items compare selected economic indicators for the US and the USSR and for Communist China and India. With the exception of a few minor changes in format and the inclusion of certain new data, the 1959 *Handbook* is similar to previously published editions of the *Handbook*.

Unless otherwise indicated, data for the US, for the countries of the Sino-Soviet Bloc, for totals for NATO, for totals for the Sino-Soviet Bloc, and for totals for the European Satellites are presented for all years covered. Data for the individual

*Including the USSR, Communist China, North Korea, North Vietnam, Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Rumania.

**Including the US, Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the UK, and West Germany. The Saar has been added as a separate political entity because its industrial production often is listed separately in the sources used.

countries of NATO and for other countries of the Free World are presented only for the latest two years available.

The titles of the tables are indicative of the commodities, years, and countries covered. A title of a table which includes only the name of the commodity or commodities and the years covered is intended to indicate coverage for NATO and the Sino-Soviet Bloc. Other countries of the Free World, however, also may occasionally be included in the table when such countries are significant producers. The title of a table will indicate the countries included in the table if any significant group of countries is omitted from the table.

2. Sources and Reliability.

In the 1959 *Handbook*, estimates for the Sino-Soviet Bloc are as of 1 May 1959 and generally are estimates maintained by this Office. When estimates other than those of this Office are used, specific source references are given. Data for countries of NATO generally are from unclassified publications of the UN and of the Organization for European Economic Cooperation (OEEC) and from official publications of the individual countries. Reasonable care has been exercised in selecting sources, but because it has not been feasible to check the accuracy of such sources and data, this Office does not assume responsibility for their accuracy.

3. Footnotes and Symbols.

The importance of the footnotes for the tables cannot be overstressed. These footnotes are used for exceptions to data in the tables and should be noted carefully. In the tables the symbols *N.A.* and *Negl.* are used. The symbol *N.A.* is used when information on the existence of data or on the magnitude of data is not available, and the symbol *Negl.* is used when data are known

SECRET

iii

SECRET

to exist but, when recorded in terms of the rounded data, are less than one-half of the final significant digit.

4. *Rounding and Totals.*

There is consistency with respect to rounding within each table but not among tables. Within each table, data for the individual countries have been rounded consistently to permit maximum use of available information. Because of the limitations in accuracy of the totals for NATO, for the Sino-Soviet Bloc, and for the European Satellites, totals have been rounded, with few exceptions, to three or fewer significant digits. Additions of the unrounded data may therefore not agree with the rounded totals. In the tables, totals are shown in italics.

No adjustment is made to compensate for gaps in intelligence. Totals are omitted, however, if the missing data are believed to represent a significant portion of the total. Estimated world totals are included only when the estimates are available in the sources employed and when they do not conflict with the summation of the other data used.

5. *Political Boundaries.*

Unless otherwise indicated, all data relate to present political boundaries and have been adjusted accordingly for the years before World War II. The exceptions to current boundaries have been noted in the footnotes in every case in which the date of the information was known.

CONTENTS

	<i>Page</i>	<i>Page</i>	
ECONOMIC INDICATORS			
1. Estimated Gross National Product at Market Prices, 1950 and 1955-58	1	15. Production of Coal, 1955-58	14
2. Comparison of Selected Economic Indicators for the US and the USSR, Selected Years, 1938-58, and 1965 Plan	2	16. Production of Hard Coal, 1938, 1946, 1950, and 1955-58	15
3. Comparison of Selected Economic Indicators for Communist China and India, Selected Years, 1950-58	4	17. Production of Brown Coal and Lignite, 1938, 1946, 1950, and 1955-58	16
4. Distributive Shares of Gross National Product in the USSR, 1958	5	18. Production of Peat, 1938, 1950, and 1955-58	17
5. Indexes of Industrial Production in the US and the Sino-Soviet Bloc, 1950 and 1955-58	5	19. Production of Metallurgical Coke, 1938, 1950, and 1955-58	18
6. State Budget of the USSR, 1956-58 and 1959 Plan	6	20. Production of Crude Petroleum, 1938, 1946, 1950, and 1955-58	19
7. Estimated Soviet Military-Economic Expenditures and the Announced Soviet Defense Budget, 1957-58	7	21. Production of Natural Gas, 1938, 1950, and 1955-58	20
8. State Budget of Communist China, 1955-58 and 1959 Plan	8	22. Production of Petroleum Products, 1938, 1950, and 1955-58	21
		23. Production of Gasoline, 1938, 1950, and 1955-58	22
		24. Production of Kerosine and Jet Fuel, 1938, 1950, and 1955-58	23
		25. Production of Diesel Fuel, 1938, 1950, and 1955-58	24
		26. Production of Lubricating Oils, 1938, 1950, and 1955-58	25
		27. Production of Residual and Other Petroleum Products, 1938, 1950, and 1955-58	26
POPULATION			
9. Total Population, 1938, 1946, 1950, 1955-58, and 1960 Projection	9	MINERALS AND METALS	
10. Civilian Employment, 1950 and 1955-58	10	<i>A. Iron, Steel, and Manganese</i>	
11. Agricultural Employment in the US and the Sino-Soviet Bloc, 1950 and 1955-58	11	28. Production of Iron Ore, 1938, 1950, and 1955-58	27
12. Nonagricultural Employment in the US and the Sino-Soviet Bloc, 1950 and 1955-58	11	29. Production of Manganese Ore, 1938, 1950, and 1955-58	28
13. Military Age Group in the US and the Sino-Soviet Bloc, 1956 and 1961 and 1966 Projections	12	30. Production of Pig Iron, 1938, 1946, 1950, and 1955-58	29
		31. Production of Crude Steel, 1938, 1946, 1950, and 1955-58	30
		<i>B. Ferroalloying Metals</i>	
		32. Production of Chrome, 1938, 1950, and 1955-58	31
		33. Production of Tungsten, 1938, 1950, and 1955-58	32
FUELS AND POWER			
14. Production of Electric Power, 1938, 1946, 1950, and 1955-58	13

Communist China	39.4	98.1	120.4	134.6	186.0	21.4
India	44.2	59.6	65.8	70.7	N.A.	N.A.
Cement (million metric tons)						
Communist China	1.41	4.50	6.40	6.70	10.00	27.7
India	2.66	4.56	5.01	5.69	6.17	11.1

^a For detailed information on the items for Communist China, see the pertinent tables. Data for India are primarily from UN sources or from official Indian statistical publications.

^b The base year is the year before the stated year.

^c Data are as of midyear.

^d Gross production by enterprises generating primarily for public use but excluding generation by industrial establishments generating primarily for their own use. In 1956, total net production was 11.97 billion kilowatt-hours.

^e Production estimated from planted acreage.

^f Metric ton-kilometers.

Table 4
Distributive Shares of Gross National Product^a
in the USSR
1958

Category	Percent of Total
Consumption	61-63
Investment	25-27
Defense	10-12
Administration	2

^a Percentages are based on ruble values expressed in 1955 prices. Estimated GNP for 1958 in 1955 rubles was 1,340 billion rubles. Percentages in this table are based on adjusted value added, which equals GNP at market prices plus subsidies minus indirect taxes. The ranges of the ruble values from which the percentages were derived prevent a more precise statement of the distribution of final product among the end uses.

Table 5
Indexes of Industrial Production in the US and the Sino-Soviet Bloc
1950 and 1955-58

Country	1950=100				
	1950	1955	1956	1957	1958
US	100	124	128	128	120 ^a
USSR	100	168-180	185-194	196-206	214-224
Communist China	100	318	418	447	590
North Korea ^b	N.A.	144	183	264	280
North Vietnam ^c	N.A.	100	210	433	505
European Satellites ^d	100	160	168	182	199 ^a
Bulgaria	100	165	184	207	234
Czechoslovakia	100	137	149	161	177
East Germany	100	173	183	197	217
Hungary	100	168	143	173	195
Poland	100	159	170	182	195
Rumania	100	171	176	202	221

^a Preliminary estimate.

^b 1949 equals 100.

^c 1955 equals 100.

^d Data for Albania are not available.

NOTE: The US index is the Federal Reserve Board series based on value added weights. The Soviet index has been calculated on a similar basis. Data for the other countries of the Sino-Soviet Bloc, however, are the official gross value series. The official Soviet index is as follows:

1950	1955	1956	1957	1958
100	185	205	225	247

Administration	12.5	12.1	11.9	11.9	11.9	N.A.	11.5
Defense	102.5	97.3	96.7	N.A.	96.3	N.A.	96.1
Loan service ^e	(16.3)	16.3	18.0	N.A.	Negl.	Negl.	Negl.
Reserve funds of the Council of Ministers	13.0		14.0		16.7		21.8
Undisclosed expenditures	26.5	28.2	30.9	N.A.	32.9	N.A.	37.3
Total	569.6	563.5	604.6	607.3	627.7	638.5	707.6
Budget surplus	23.1	22.4	12.6	19.6	15.2	22.7	15.7

^a The official Soviet exchange rate is 4 rubles to US \$1 for merchandise transactions and 10 rubles to US \$1 for tourist and other "invisible" transactions. Although neither of these rates is appropriate to convert Soviet budgetary entries from rubles to dollars, they do suggest the general order of magnitude.

^b Including return of surplus working capital.

^c Including (1) compulsory bond purchases by the population in annual mass loan campaigns, (2) voluntary bond purchases by the population at savings banks, (3) bond purchases by banks investing the net increase in savings deposits, and (4) bond purchases by the state commercial insurance organization investing part of its reserves.

^d Data in parentheses are estimates.

^e Including loan service payments to savings banks as well as to the population.

^a Excluding for 1958, Greece, Iceland, Luxembourg, and Turkey. Data refer to total production at generating centers (therefore including transmission losses) except for 1958 for Denmark and the UK and for 1938 for Greece. These countries include production by enterprises generating primarily for public use. For further information regarding data for these countries, see footnote for individual countries.

^b Preliminary estimate.

^c Data are gross estimates based on reported net, adjusted by adding 5 percent to include production which is consumed on the station itself. These data are therefore a more realistic comparison with countries of the Sino-Soviet Bloc, which have been reporting on a gross basis.

^d 1939.

^o Data are for the year beginning on 1 April.

^f Production by enterprises generating primarily for public use.

^g Total for 1958 for France is approximately 95 percent of gross production.

^h Excluding Northern Ireland.

¹ Data are for the year ending on 30 September.

Table 15

Rumania	2.97	3.14	3.41	3.58

^a Including hard coal (anthracite and bituminous), brown coal, and lignite in terms of standard fuel. For actual tonnages of hard or brown coal, see Tables 16 and 17 (pp. 15 and 16, respectively, below).

^b Million metric tons of standard fuel. The average calorific values used to convert to standard fuel of 7,000 kilocalories per kilogram are listed below. Computations for standard fuel were not carried out for data before 1952, because to do so, using these same values, would be misleading. In most countries, there has been since 1938 a deterioration in the quality of coal which has resulted in lower calorific values. Because the trend has not been uniform, it would be difficult to arrive at the appropriate calorific values to be used for years before 1952.

Average Calorific Values
(Kilocalories per Kilogram)

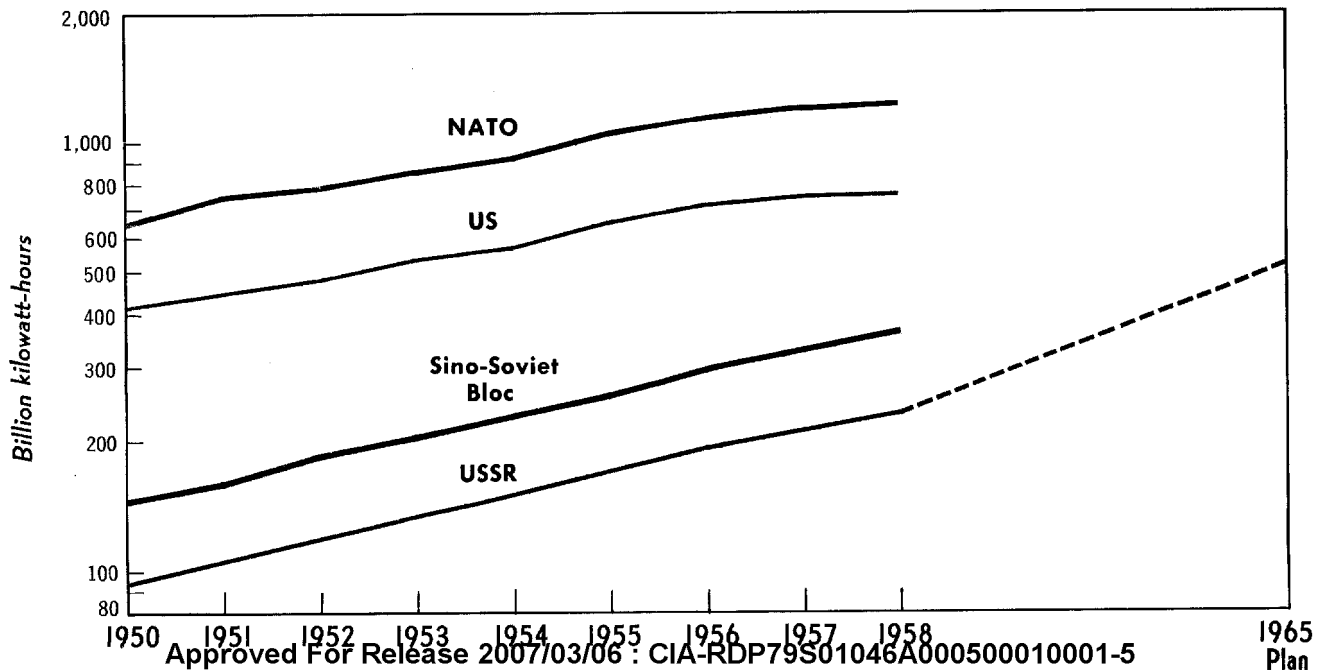

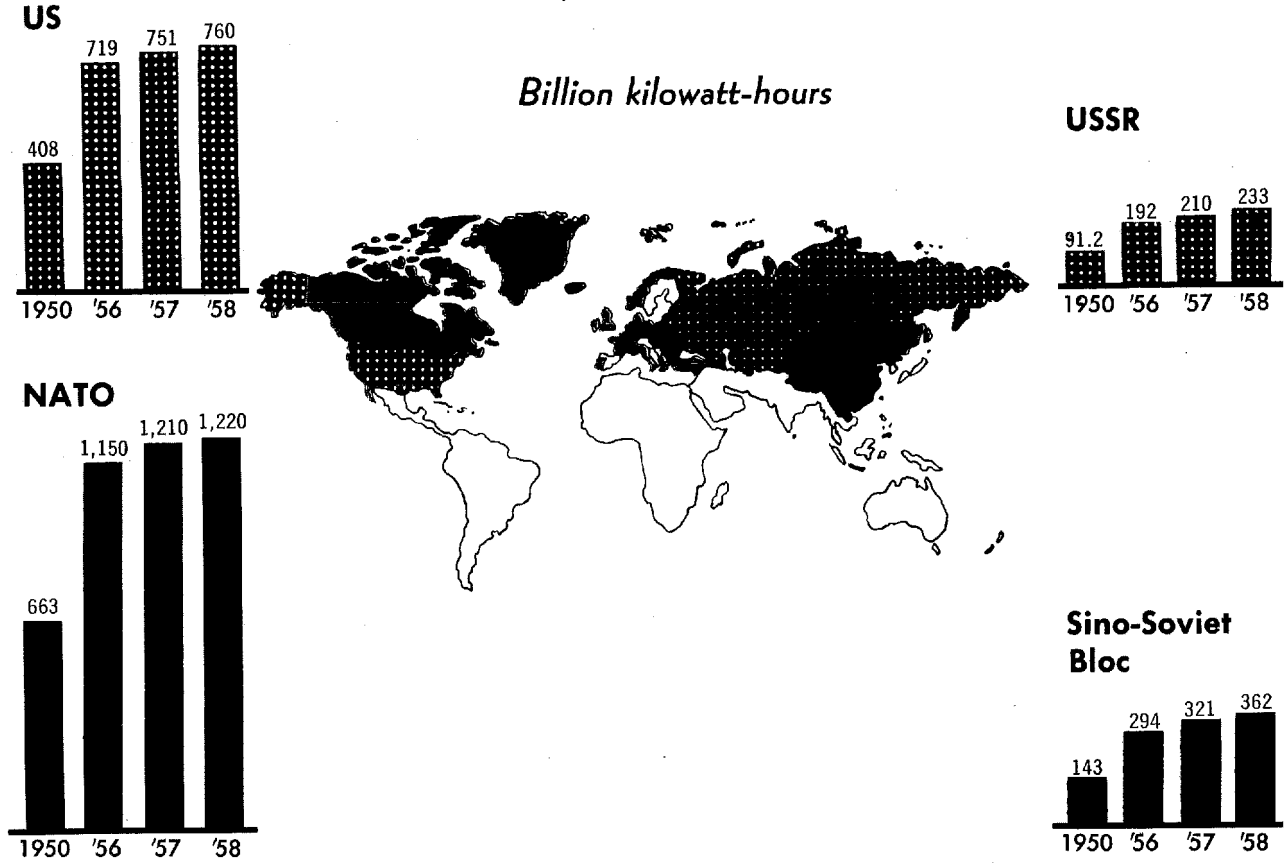

Country or Area	Hard Coal	Brown Coal and Lignite
NATO (excluding the US)	6,700	2,800
US	7,260	3,890
USSR	6,653	2,925
Communist China	6,500	N.A.
North Korea	6,100	4,240
North Vietnam	6,500	N.A.
Albania	N.A.	3,500
Bulgaria	5,250	3,476
Czechoslovakia	5,090	3,492
East Germany	6,000	2,200
Hungary	4,700	3,250
Poland	6,000	2,000
Rumania	6,500	3,300

^c Excluding Iceland and Luxembourg. Production for Belgium, Norway, the Saar, and the UK includes hard coal only. Production for Denmark and Greece includes brown coal and lignite only.

^d Preliminary estimate.

^a Data presented in this table are not intended to be totals of data in Tables 23 through 27 (pp. 22-26, respectively, below), because this table includes some minor miscellaneous products which are not in any of the following tables.

^b Excluding for all years, Iceland and Luxembourg; for 1938, Denmark, Greece, Norway, Portugal, and Turkey; and for 1950, Greece. Data refer to total production less consumption at the refineries except data for 1938 for France, which include the internal consumption of refineries. Synthetic products and substitute fuels are excluded.

^c Including products obtained from natural gasoline treated in refineries.

^d Data for North Korea are not available. There has been no production in North Vietnam. Data for the Sino-Soviet Bloc include petroleum products from indigenous and imported natural crude oil and from synthetic sources.

^e Excluding relatively small yields of synthetic stocks.

^f 1937.

^g Including alcohol and benzol blended with motor gasoline.

India	5.16	5.80	Sweden	19.92	18.60			

^a Excluding for all years, Denmark, Iceland, and the Netherlands; for 1955-58, Greece; for 1938 and 1950, Portugal; and for 1958, Turkey. Data refer to the gross amount of marketable iron ores in the state in which they leave the mines, including manganiferous ores but excluding pyrites. Metal content of ore in the NATO countries and other Free World countries is as follows: Austria, Luxembourg, the UK, and West Germany, 30 percent; Belgium and France, 35 percent; Italy, Portugal, Spain, the US, and Yugoslavia, 50 percent; Algeria, Canada, and Japan, 55 percent; Sweden, 60 percent; and India, Norway, Turkey, and Venezuela, 65 percent.

^b Excluding manganiferous ores containing 5 percent or more of manganese.

^c There has been no production in Albania. Metal content of ore in the countries of the Sino-Soviet Bloc is as follows: USSR, commercial grade; East Germany, 26 to 28 percent; Hungary, 30 percent; Czechoslovakia, 34 percent; Poland, 35 percent; Rumania, 45 percent; and Bulgaria, Communist China (see footnote d, below), and North Korea, 50 percent.

^d Iron content of crude ore production varies from 33 to 58 percent. Data given here, however, are in terms of 50 to 55 percent.

^e Excluding very low grade ore mined for producing crude iron in native furnaces.

^f 1937.

^g Shipments.

^h Including ferrotitanium.

ⁱ State-owned mines only.

^j Including iron sand.

^a Unless otherwise indicated, sulfur from all sources is included.

^b Excluding Belgium, Denmark, Iceland, Luxembourg, and the Netherlands. Total for 1938 includes all Germany. Unless otherwise indicated, all sulfur produced in the NATO countries is from pyrites (see country footnotes).

^c Although most sulfur produced in the US is native sulfur, the following amounts produced from pyrites are included: 1938, 222,000 metric tons; 1950, 399,000 metric tons; 1955, 416,000 metric tons; 1956, 439,000 metric tons; and 1957, 443,000 metric tons.

^d There has been little or no production in North Vietnam. All sulfur produced in countries of the Sino-Soviet Bloc, with the exception of about 80,000 to 160,000 metric tons of native sulfur in the USSR and 70,000 to 100,000 metric tons of native sulfur in East Germany, is from such sources as pyrites, gypsum, waste gases, and kieserite.

^o Sulfur content of pyrites.

^f Including 5,600 metric tons of native sulfur.

^g Sales.

^h About 1 percent of annual production is native sulfur.

ⁱ About 170,000 metric tons annually are native sulfur.

^j About 13,000 metric tons annually are native sulfur.

Table 44
 Production of Grain in the US and the Sino-Soviet Bloc^a
 1938, 1950, and 1955-58

^a Rough or paddy rice. Data apply to the beginning of the crop year—for example, data for 1958 are equivalent to data for 1958/59.

^b Including France, Greece, Italy, Portugal, Turkey, and the US.

^c Average for 1935-39, using data for 1938 for the US.

^d Preliminary estimate.

^e Data for the USSR are not available. Czechoslovakia, East Germany, and Poland have no production of rice.

^f Average for 1931-37.

^g 1939.

^h Average for 1934-38.

ⁱ Estimated from planted acreage.

^a Including nitrogen fertilizers (in terms of nitrogen), phosphorous fertilizers (in terms of phosphoric anhydride), and potassium fertilizers (in terms of potassium oxide).

^b Tonnages given refer to the nutrients expressed as nitrogen, phosphoric anhydride, and potassium oxide.

^c Including the following countries for the various types of fertilizers: (1) nitrogen: all NATO countries except, for all years, Denmark, Greece, Iceland, and Luxembourg, and for 1939 and 1950, Portugal; (2) phosphorus: all NATO countries except, for all years, Iceland, and for 1939, Turkey; and (3) potassium: for all years, only France, the US, and West Germany; except for 1939, Italy; and except for 1939 and 1950, the Netherlands. All NATO data are for the year ending on 30 June.

^d 1939.

^e There has been no production in North Vietnam and Albania.

^f 1941.

^g 1937.

^a Including tractor-drawn and tractor-mounted drills.

^b Corn drills (planters), including combined seed and fertilizer drills.

^c Excluding tractor-drawn corn planters and tractor-drawn corn and cotton planters. Published data list drawn units as a category without a breakdown into tractor- and horse-drawn units. If it is assumed that the "3-row and larger" drawn corn planters are tractor drawn, production for the years shown would increase in the following amounts: 1951, 80,549 (two-row and larger); 1955, 20,573; 1956, 16,480; and 1957, 18,635.

^d 1951.

^e There has been no production in countries of the Sino-Soviet Bloc that are not listed.

^f 1937.

^g Plan.

^h Preliminary estimate.

Table 91
Production of Tractor Moldboard Plows^a
1938, 1950, and 1955-58

Country	Units					
	1938	1950	1955	1956	1957	1958
UK	5,156	52,080	26,571	19,534	22,443	27,830
US	117,960	341,710	141,174	101,915	103,287 ^b	76,412 ^c
Sino-Soviet Bloc ^d	105,000	159,000	137,000	166,000	169,000	199,000
USSR	96,400 ^e	121,900	103,200	123,500	127,600	164,000
European Satellites	8,530	37,300	33,300	42,200	41,600	35,400
Bulgaria	0	900	1,947	3,374	4,303	2,898 ^f
Czechoslovakia	0	20,812	9,955	9,786	14,213	11,554
East Germany	8,534 ^g	7,304	3,572	5,056	3,587	N.A.
Hungary	0	3,274	4,556	7,000 ^h	N.A.	N.A.
Poland	0	N.A.	9,296	13,185	15,515	14,830
Rumania	0	5,030	4,005	3,766	4,006	6,150

^a Excluding surface (shallow) plows.

^b For tractor-drawn, two-way plows and tractor-mounted four-bottom and larger plows, manufacturers' shipments rather than production are included.

^c Data exclude tractor-mounted two-way plows (production of 2,398 units in 1957) and probably exclude tractor-drawn two-way plows (shipments of 1,462 units in 1957) and tractor-mounted four-bottom and larger plows (shipments of 9,625 units in 1957).

^d There has been no production in countries of the Sino-Soviet Bloc that are not listed.

^e 1937.

^f Plan.

^g Fiscal year 1937/38.

^h Plans for other types of agricultural machines announced with plans for tractor plows subsequently were changed. Planned data for tractor plows also may have been changed.

Table 92
Production of Corn Harvesting Combines in the US and the Sino-Soviet Bloc^a
1938, 1950, and 1955-58

Country	Units					
	1938	1950	1955	1956	1957	1958
US	16,722	88,836	33,949	34,149	40,902	42,181
Sino-Soviet Bloc	0	0	4,010	14,300	32,100	N.A.
USSR	0	0	4,011	14,214	31,400	6,100
Bulgaria	0	0	1	100 ^b	N.A.	N.A.
Hungary ^c	0	0	Negl.	Negl.	Negl.	Negl.
Rumania	0	0	1	10	670	N.A.

^a Cornpickers produced in the US may not be compared directly with corn harvesting combines produced in the Sino-Soviet Bloc. The Bloc combine picks up and chops the cornstalks in addition to picking the ears from the stalks; the US cornpicker leaves the cornstalks in the field.

^b Plan.

^c Hungary produced its first five corn combines in 1954. Production still has not been initiated on a regular basis, although the 1957 and 1956-60 plans (announced just before the 1956 uprising) called for production of 1,000 and 2,970 units, respectively. Hungary has been selected as one of the European Satellites to specialize in production of corn harvesting combines.

Table 93
Construction of Maritime Vessels in the Sino-Soviet Bloc^a
1950 and 1955-58

Country	Thousand Gross Register Tons				
	1950	1955	1956	1957	1958
Sino-Soviet Bloc	76.8	306	389	373	417
USSR	43.0	132.0	206.6	178.7	150.0
Communist China	4.0	22.0	15.0	20.0	30.0
European Satellites	29.8	152	167	175	237
East Germany	5.6	61.1	54.1	55.4	100.5
Hungary	13.8	15.6	21.3	12.3	20.4
Poland	10.4	75.1	91.5	107.0	116.5

^a Including only countries in which domestic construction is a significant percentage of over-all construction. Data refer to ocean-going tankers, cargo and passenger vessels, self-propelled barges, and harbor craft. Data represent tonnage put in place during the year and thus may differ from compilations based on vessels launched or completed.

Table 94
Launchings of Merchant Vessels in the NATO Countries^a
1938, 1950, and 1955-58

Country	Thousand Gross Register Tons					
	1938	1950	1955	1956	1957	1958
NATO	2,300	2,730	3,770	4,090	4,960	5,850
US	160	437	73	169	359	732
Belgium	30	66	81	92	114	139
Canada	11	40	22	22	34	64
Denmark	158	125	154	130	171	250
France	47	181	326	299	428	451
Italy	94	107	167	358	485	551
Netherlands	240	228	397	450	476	556
Norway	55	53	141	172	239	259
Portugal	2	7	6	15	10	12
UK	1,026	1,325	1,474	1,383	1,414	1,402
West Germany	479	155	929	1,000	1,231	1,429

^a Excluding Greece, Iceland, Luxembourg, and Turkey. Data refer to total gross register tonnage of all merchant vessels of 100 gross register tons or more which were launched, excluding those which are non-self-propelled. Although tonnage launched is not strictly comparable to tonnage constructed as used in Table 93 (above), data in these two tables may be compared where only approximate accuracy is required.

^a Data refer to either two- or four-axle units, and the size is given in the footnotes if it is known. Because of the lack of comparability in data, totals for NATO and the Sino-Soviet Bloc are omitted. Unless otherwise indicated, data are as of the end of the year. Data for Albania and Rumania are not available.

^b All freight cars in the US have four axles or more.

^c Preliminary estimate.

^d Equivalent two-axle units. Physical units are estimated at about 915,000 in 1958, of which about 74 percent are four-axle or multi-axle cars.

^e Most Chinese Communist and North Korean cars have four axles.

^f 1939.

^g 1937.

^h State railroad cars only.

Rumania	Billion 1 January 1955 lei	N.A.	2.85	6.83	8.08	6.78	8.10

^a Because of the difficulty of determining valid exchange rates, data are not presented in terms of a common currency. Instead of rates which would be appropriate to apply to the construction industry, the following official rates of exchange are listed here merely to give a general idea of the value of the foreign currencies. These rates should be used with caution because they have been established and maintained arbitrarily.

Country	Currency	Units of Bloc Currency per US \$
USSR	ruble	4.0
Albania	lek	50.0
Bulgaria	lev	6.8
Communist China	yuan	2.46
Czechoslovakia	koruna	7.17
East Germany	Deutsche mark	2.22
Hungary	forint	11.74
North Korea	won	120
Poland	zloty	4.0
Rumania	leu	6.0

^b Total for 1958 includes some investment by local governments (for example, provinces and municipalities) and is therefore not comparable to data for years before 1958.

^c Total for 1954-56 (Three Year Plan).

^d Believed to be in current prices.

^e 1937.

^a Unless otherwise indicated, estimates are for the end of the year. Data for the Sino-Soviet Bloc refer to telephone subscribers, including both private and civil government (other than military) users. Data for NATO refer to telephones in use, including both public and private telephones which can be connected to a central exchange. The number of subscribers is less than the number of telephones in the same country, but no reliable ratio between the two can be supplied.

^b 1937.

^c Data for North Vietnam are not available.

^d Including telephones in booths.

^e Data are as of midyear.

^f Data for 31 March.
