NOTES

Korea: The capability of North Korean agent teams to engage in sabotage in South Korea is illustrated by the derailing of a train northeast of Seoul on 5 September. This is the first act of North Korean sabotage on this scale since the early 1950s and may presage additional attacks on transportation targets. The agents responsible for this incident apparently infiltrated from the North and returned by a preplanned escape route.

25X1

Dominican Republic: President Balaguer has replaced several top military commanders in what appears to be the first step in a reshuffle of the military hierarchy. The President's actions seem designed to strengthen his control of the security forces and to curb increasing dissatisfaction among certain elements of the armed forces, particularly the air force.
