NOTES

Korea: North Korean infiltrators staged three new attacks in the Demilitarized Zone south of the demarcation line over the weekend. One US soldier was slightly wounded Saturday when his patrol was pinned down by Communist fire; another US soldier was killed and three were wounded Sunday in a similar action. At least three North Koreans were killed and an unknown number were wounded. In a related incident, a UN Command observer team investigating Saturday's attack was fired on by North Koreans.

[Redacted]

USSR: Moscow has announced that Cosmos 212 and 213, the two unmanned satellites that performed an automatic rendezvous and docking maneuver, were brought down in the USSR on 19 and 20 April. Each satellite was returned after about five days in orbit, the longest flights on record for Soyuz capsules. On 15 April, the two capsules were automatically joined together for almost four hours and then separated.
