	-2-
	of cattle or 1,000 pigs per day. Although cattle and p.gs were the main livestock received, some sheep and rabbits were also slaughtered there. The meat production averaged approximately 45 metric tons per day.
б.	Of all meat slaughtered at Kremenchug, approximately one-half was assigned to export prior to 1941 and the balance was assigned to the domestic market. All meat destined for export from the Kremenchug plant was usually shipped by refrigerated car to Odessa. If the meat was consigned to the domestic market the main shipping points were Kiev, Moscow, and Leningred.
7.	Practically every part of animals slaughtered was utilized in one form or another. Forty-five percent of the total weight of livestock slaughtered was recovered in meat. Hides were shipped to the last

- Forty-five in meat. 1 to the leather industry. Fats were shipped to the scap industry, hoofs and horns to the button and fertilizing plants, while intestimes and scrap meat were turned into sausage, smoked neat and casings.
- o. The Director of the Kremenchug plant Party member. Although he had had no training in the meat business prior to was one Sergei hedyk, a his assignment as director, he did, nevertheless, over a period of years, acquire a working knowledge of the business. Most of his duties were administrative and one of his biggest problems was satisfying big-shot Party and Government officials who came to the plant for special cuts of meat. In order to preserve iomestic harmony, he had to pass out special cuts to these individuals. However, he was working on strict production figures and in order to make up the losses incurred it was necessary for him to utilize special funds provided to the plant and go out on the open or black market and purchase additional cattle or nega.
- The factory at Kremenchug was considered modern in 1941 and was always able to 9. handle all livestock assigned to it. An average of 400 persons were employed at the plant, except of course during the peak season when it was necessary to
- The meat at the Kremenchug production trust was inspected by government 10. veterinarians and graded from one to four. Grade one was usually assigned to the export market, grade two to the domestic market and grades three and ion to the production of sausage, smoked meats, etc.
