SOVIET ENTERPRISES CONTINUE TO SUPPLY NEW HYDROELECTRIC AND CANAL PROJECTS

/Numbers in parentheses refer to appended sources_7

In the period from 26 November 1950 to 3 February 1951, the Kuybyshev, Stalingrad, and Kakhovka GES and canal construction projects continued to receive extensive press coverage. Most space was devoted to the more recently announced project, the Volga-Don Canal, with its 160,000-kilowatt Tsimlyansk GES ______ The Volga-Don Canal, to go into operation in the spring of 1952, is much more advanced than the other construction projects. A basic structure 20 meters high and nearly a half kilometer long has been erected to contain the concrete work in constructing the dam of the Tsimlyansk GES. Traveling cranes are mounted on top of this structure to speed up concrete laying and 50 kilometers of railroad track have been laid in the construction area to facilitate getting the construction materials to the working areas.(1)

Nearly 70 percent of the inhabitants of the old population centers in the Tsimlyansk Rayon have already moved to new places. One hundred and twenty homes have been occupied in the new city of Tsimlyansk, where a railroad station and river port will be built during 1951. Over 20 schools, clubs, and other public buildings have been built in this area during 1950.(2)

The first icebreaker, the Volga, has been built for the Volga-Don Canal by the Gor'kiy "Krasnoye Sormovo" Plant and is now undergoing tests. A second icebreaker, the Don, will be completed soon.(3)

Machinery, equipment, and construction materials continued to arrive at the construction sites of other hydroelectric and canal projects in quantity. The following plants supplying materials for these projects have been mentioned in the Soviet press during the period from 26 November 1950 to 3 February 1951.

Rolling mill No 2 will produce 2,000 tons of rolled iron for Volga-Don Canal in Jan (4)

Producing round section iron for Kuybyshev GES (5)

Ships tens of carloads of rolled iron products to Volga-Don Canal daily.(4) Started production of rails for Kakhovka GES (5)

Shipped a several-thousand-ton trestle and 400 tons of heavy steel plate for navigation sluices to Tsimlyansk GES.(6) Produced metal structures for concrete pouring and drop gates for Tsimlyansk GES.(7) First welding shop is making structures for walking excavators for construction projects (8)

Started construction of steel towers for carrying electric transmission lines to Kakhovka GES construction area (9)

Tubing shop has shipped tubing to the Tsimlyansk GES (10)

Shipped first order of tubing to Volga-Don Canal project; presently making light-duty tubing at considerable saving (11)

Has welded 650 tons of high-quality steel for Volga-Don Canal tens of tons of steel plate and seamless pipe shipped to project by steel plate and seamless pipe shops (6)

Shipped 4 carloads of finished pipe, flanges, and other parts and materials to the Volga-Don Canal (b)

Produced drive pipe for Volga GES (12)

Started production of pipe for Tsimlyansk and Kuybyshev GES (13)

Produced hundreds of tons of aboveplan metal for hydroelectric projects (14)

Produced hundreds of tons of aboveplan steel for hydroelectric projects (14)

Remarks

Shipped one load of porcelain insulators to Kuybyshev GES before 30 Nov; to complete rest of order by mid-Jan (15)

Making an experimental model of a gigantic insulator for Kuybyshev GES (16)

Producing insulators for Volga GES and making experimental insulators, one of which is $2\frac{1}{2}$ meters high (17)

Shipped 60,000 units of low- and highvoltage insulators to construction projects (18)

Filling an order for Kuybyshev GES 3 times larger than previous order (19)

Producing metal telephone wire for Volga-Don Canal (20)

Will produce first order of experimental cable for Volga GES by 17 Dec (21)

Making apparatus for automatically regulating the sluice gates of Volga-Don Canal (9)

In 1951, will produce electric equipment for main sluices of Volga-Don Canal and Tsimlyansk GES (22)

Developing new type winding for transformers which will be needed by hydroelectric construction projects (5)

Built an experimental circuit breaker for Volga GES (23)

Will make a large generator for construction of Stalingrad GES (24)

Has completed working plans of turbines for Tsimlyansk GES.(25) A model which will serve as a mould in casting the turbine blades is being completed for the same project (26)

Will cast the first turbine parts for Tsimlyansk GES.(27) Producing steel castings for new construction projects (23)

Remarks

Shipped 35 portable electric power plants of varied capacity, 2 turbogenerators, and 5 rail-cutting machines to Kuybyshev and Stalingrad GES (28) 50X1-HUM

Shipped 8 portable diesel electric power plants to Kakhovka GES (29)

Producing hydraulic apparatus for Kuybyshev and Stalingrad GES and Voiga-Don Canal (30)

Will produce excavating machinery, other equipment for Volga-Don Canal (31)

Shipped 16 "EM-301" excavators to Volga-Don Canal (32)

Shipped 17 excavators to "Volgodonstroy" in 1950 (33)

Shipped several tens of 3.4-cubicmeter walking drag-line excavators and will shortly ship 4-cubic-meter drag-line excavators to Volga-Don Canal.(7) Producing winches for earth-removal machines for Volga GES and Volga-Don Canal; produced sluice gates for Volga-Don Canal.(34) Started production of main turbine parts for Volga-Don Canal (31)

Shipped an order for excavator track to Stalingrad GES (35)

Produced artesian, centrifugal, and heavy excavation pumps for Volga-Don (36)

Shipped twelve 20-25 cu m capacity concrete pumps, 200 vibrator pipes for lowering prepared concrete, and 150 special pumps for pumping mud from trenches to Volga-Don Canal project (10)

Shipped excavation pumps to hydroelectric construction projects (5)

Shipped an order of 15 centrifugal pumps to hydroelectric construction projects (37)

Shipped large order of excavation pumps and pipe to Volga-Don Canal project (38)

Remarks

Producing new electric driven pur,s and making ready for production of cast cutting edges for percussion drills for Kakhovka GES (39)

Producing bearings for concrete pumps and other aggregates destined for the new hydroelectric projects (5)

Shipped heavy-duty hoists to Stalingrad and Kakhovka GES; also making machinery for Volga-Don Canal (32)

Will produce 150-ton electric cranes for construction of Tsimlyansk GES (40)

Produced electric traveling cranes and other hoist machinery for Kuybyshev GES and Volga-Don Canal; at present, producing 28 hoists for Volga-Don Canal and 14 for Kuybyshev GES (41)

Puring past 2 years, supplied Volga-Don Canal with numerous machines, including tens of traveling cranes which are used to lay concrete; shipped 9 dredging machines to Volgodonstroy in 1949 (42)

- Shipped 4 large "SLK-42" cranes and 30
 tons of high-quality drilling equip ment to Stalingrad and Kuybyshev
 GES.(43) Producing self-dumping
 railroad cars and belt conveyers to
 construction projects (44)
- Shipped hundreds of road-building machines to new construction projects (45)

Produced tens of bulldozers for Main Turkmen Canal project (12)

Shipped many general-purpose automatic loading machines to Main Turkmen Canal project; presently filling order for Kakhovka GES (29)

Shipped large conveyers to Volga-Don Canal (46)

Shipped 260 units of belt conveyers, worm conveyers, and vertical elevators to Volga-Don Canal (47)

Produced 38 "BMZ" woodworking machines for Kuybyshev GES (48)

Timber trusts of Bobruysk Oblast Shipped 1,500 desk-type telephones to Volga-Don Canal (29)

Shipped tens of manually operated telephone stations to new construction projects.(49) Produced an automatic telephone exchange of 400 numbers for Stalingrad GES (5)

Shipped a consignment of vertical boilers to Kuybyshev GES.(50)

Produced first 4 "SO" type locomotives for Volga GES ahead of schedule (5)

Producing large electric construction cranes for Volga GES (51)

- Shipped 20 trucks to Kuybyshev GES and will shortly send a column of trucks to Volga-Don Canal project (52)
- Has undertaken repair of tractors, construction machinery, and machines for Volga-Don Canal; will also send specialists to construction site to repair cranes and excavators (53)
- Shipped 2 experimental dump trucks and one experimental side dumping vehicle to Volga-Don Canal; "MAZ" dump trucks are already working at the construction site (54)

Will produce tens of dump trucks for the Volga-Don Canal (10)

Produced 917 mooring fenders for Volga-Don Canal (55)

Producing gas pumps for Main Turkmen Canal and Volga GES (26)

Shipped 65,000 cinder blocks to Volga-Don Canal (56)

Producing firebrick for Kakhovka GES (6)

Will produce 1,700 sq m of linoleum for Kuybyshev GES and 500 sq m for Stalingrad GES in 1951 (49)

Shipped new consignments of lumber to Kuybyshev and Kakhovka GES (12)

Shipped 40 carloads lumber to Tsimlyansk GES (57)

Will ship 22 carloads construction timbers to Volga-Don Canal during 1st quarter 1951 (58)
