WEATHER FORECASTS FOR POLAND, 27 NOVEMBER - 24 DECEMBER 1951

The following reports were compiled by the State Hydrological and Meteorological Institute, Krakow. All temperatures are in centigrade.

27 November

Variable cloudiness, increasing occasionally with possible light rain. Highest temperature during the day 8 degrees with light frost during the night. Temperature range high in the mountains, from -7 to -13 degrees. Moderate and strong northerly and northwesterly winds.

28 November

Generally cloudy with rain. Snow high in the mountains. Highest temperature during the day, 10 degrees; during the night, around zero. Continued temperature below zero high in the mountains. Moderate westerly winds.

29 November

Cloudy and increasingly clear. In the evening considerable intermittent cloudiness, with sleet; in the mountains, snow. Cooler. Temperature during the day, near 6 degrees; during the night, very light frost. Temperature in the mountains, from zero to -5 degrees. Prevailing moderate and strong westerly winds.

30 November

Variable cloudiness changing to mostly clear. Highest temperature during the day, 5 degrees; during the night, around zero. Temperature high in the mountains, from -6 to 12 degrees. Moderate westerly winds.

1 December

Considerable cloudiness with rain or sleet. Possible clearing locally in the western part of the country. Temperature range during the day, from 5 to 9 degrees; during the night, around zero with light frost locally.

2 December

Quite fair during the night, followed by cloudiness during the day, clearing somewhat locally. Highest temperature during the day, 10 degrees. Temperature during the night, from zero to 3 degrees. Temperature in the mountains, from -3 to 2 degrees. Prevailing moderate westerly winds, with strong westerly winds in the mountains. Zycie Warszawy on 3 December 1951 reported that on 2 December a gale swept over Warsaw. The wind velocity reached 30-40 kilometers per hour with sudden sporadic gusts of 60-70 kilometers per hour.]

3 December

Variable cloudiness with occasional rain. Cooler. Highest temperature about 4 degrees. Moderate or strong westerly and northwesterly winds with sudden gusts.

4 December

Generally cloudy and foggy with rain or sleet. Temperature range from 5 degrees during the day to around zero during the night and from -4 to -8 degrees high in the mountains. Light westerly winds.

5 December

Cloudy and foggy with rain or sleet. Temperature range from 4 to 8 degrees during the day to around zero during the night with frost locally. Temperature high in the mountains, from -5 to -10 degrees. Moderate and strong westerly and southwesterly winds.

6 December

Cloudy and foggy during the morning with a chance of some clear weather locally. Increasing cloudiness during the later hours followed by rain and becoming cooler. Temperature during the day will reach 8 degrees; during the night, around zero. Temperature in the mountains from -2 to -8 degrees. Strong westerly winds.

7 December

Generally considerable cloudiness followed by rain. Temperature during the day, around 6 degrees; during the night, around zero. Moderate westerly winds, occasionally strong with sudden gusts.

8 December

Cloudy, gradually clearing. In the mountains continued light snow. Temperature range from 5 to -3 degrees. Temperature range high in the mountains, from -2 to -8 degrees. Light westerly and northwesterly winds with occasional sudden gusts.
