As a result of a further increase in agricultural equipment, the mechanization level of agricultural work in kolkhozes of the republic was improved in 1951.

In 1951, MTS completed 64 percent more agricultural work in kolkhozes than in 1950.

The sown area of the basic industrial crop, cotton, increased 7 percent in 1951 in comparison with 1950. Cultivation of cotton plants was carried out within the period prescribed by scientific agricultural practices.

In 1951, Turkmen kolkhozes, as a result of socialist competition, had a large yield of cotton and fulfilled the state cotton procurement plan ahead of schedule. More than 70 percent of the cotton delivered was high grade.

The 1951 plan for retail commodity turnover was fulfilled 100.6 percent, including 100.5 percent for turnover in the retail trade system and 102 percent for turnover in public eating enterprises.
