	2	25X1
25X1 25X1	Comment. These observations confirm that Brandis airfield as occupied by ground attack and transport planes. One ground attack regiment and one air transport regiment are believed to be stationed there. The aircraft of the three squadrons of the transport regiment are marked by red. gray, and yellow stripes on their rudder assemblies.	
25X1 25X1	2. Cormento previously reported that army units started an exercise with combined weapons in the Brandis area on 13 January. The exercise was apparently completed on 21 January. The tanks observed in Polenz on 21 January, probably belong to the 11th Gds Tank Div while the motor vehicles observed belong to the 80% Gds Necz Div. Therefore, it is possible that units or the two divisions participated in the exercise.	25X1
25X1 25X1	3. Comment. The statement made is correct. The ground attack regiment from Dessau was transferred to Brandis on 26 December 1952.	25X1
