25X1A 1. Comment. In connection with the repurchase of former German freight cars from the U.S.S.R., standard-gauge wheel sets were sent to the rail-change points on the Soviet-Polish border, where Soviet-gauge wheel sets to be repressed in East Germany were also expected. The entire operation was probably concluded in late 1952. The wheel sets mentioned in the present report were either surplus or Soviet-gauge wheel sets to be repressed.

25X1A 2. Comment. East German sugar exports, mainly to the U.S.S.R., have been observed since early November 1952.
