1. The Walzwerk fuer Buntmetall Kupfer- und Messingwerk, Hettstedt, periodically receives purest aluminum (Reinst-Aluminium) of 99.99% purity for rolling. The purest aluminum is supplied in 75 kg. blocks about 800 x 300 x 100 mm by the VEB Elektrochemisches Kombinat, Bitterfeld.
2. The purest aluminum is rolled into sheets of various dimensions, mainly 3 m x 600 mm x 8 mm, but also 2 m x 1 m x 10 mm and 1.2 m x 1 m x 30 mm. These sheets are dispatched from the factory without further treatment. No purest aluminum is pressed, extracted, stamped, rolled, cast or otherwise fashioned into other articles in the factory.
3. In November 1952, five tons of purest aluminum were rolled into sheets and dispatched to Fischer, Reinsdorf.<sup>1</sup> A further five tons was to be rolled in December 1952.

Comment. Karl Fischer Apparate- u. Rohrleitungsbau, Reinsdorf, Wittenberg. 25X1
