1. [Redacted] Comment. The rate of incoming shipments has decreased since September 1952. [Redacted] the other hand, the rate of incoming flour shipments increased until the end of November and, subsequently, dropped again.
2. [Redacted] Comment. Again, the outgoing rail shipments are about 25 percent below the incoming shipments, except for the growing flour shipments. In 1952, the army ration supply depot received an average 242 carloads of ration supplies, including tobaccos, per month, except for August 1952, which was incompletely covered, compared with an average of 197 outgoing carloads of ration supplies, including tobaccos, per month. Some of the ration supplies were probably trucked directly to the troops stationed in the Frankfurt/Oder area but there is still a surplus of incoming shipments at the depot, indicating a further stock-piling of supplies.

[Redacted]

4. [Redacted] Comment. The officers' names are reported for the first time.
5. [Redacted] Comment. Both, the present and reference reports give a higher number of outgoing shipments than the other source. [Redacted]
