[REDACTED] 25X1

1. Radar (Kollisionsschutzgeraet) (anti-collision apparatus)

[REDACTED] the apparatus was 25X1
designed to work on a frequency of exactly 3.2 cms. The apparatus is loosely spoken
of as being on 3 cms.

2. Transmitter Work

- a. Rumania has ordered a 50 kw medium wave commercial transmitter from the Funkwerk.
- b. A task known under the code-name "SO" is being undertaken in the Funkwerk. The task concerns a 600 kw medium wave transmitter, but no other details are known.
- c. Tube RF-566 is being obtained by the Funkwerk for the large Hubertus transmitter, i.e. the Zwilling project. This is to be increased in power to 600 kw. The RF-566 tubes allegedly come from the Werk fuer Fernmeldewesen HF [REDACTED] 25X1
[REDACTED] the tubes arrive at the Funkwerk labelled "Werk HF". The only reason which could be ascertained for this belief in the true origin of the tubes was a strong doubt in the ability of Werk HF at this moment to produce such tubes.

3. Werk HF Tubes

The Funkwerk Koepenick was recently informed by the Werk HF that it was making the following VHF (UKW) tubes:

ECH-81	EF-85
6AG5	6Y6
