 7_{\circ} On 22 May, building No 73 at Doeberitz-Altes Lager was occupied by soldiers wearing red-bordered black epaulets, some with tank and artillery insignia. On 19 May, nine trucks towing 120-mm mortars left the Altes Lager for a field exercise. On 20 and 22 May, 60 to 70 soldiers were engaged in close combat

25X1 training in the billeting area. On 21 May, five AT guns[45 mm, were observed in the eastern section of the installation.

Doeberitz by components of the 1st Mecz Div. The motorcycle driving school probably belonged to the 57th Rcn En of the division and is thus confirmed until 17 May 1953. The observation of rocket launchers at Altes Lager confirms the 41st RL En (US) of the division at the installation until 18 May 1953. The column of 9 x 120-mm morters also observed at Altes Lager belonged to the 294th Mort Regt (US), as a mechanized regiment is equipped with 6 x 120-mm morters only. This indicates the confirmation of the 294th Mort Regt (US) at Altes Lager until 19 May 1953. The cantonment on Hasenheiden Berg (hill) probably was occupied by students of the officers' school of the GOFG in Potsdam and other units possibly participating in the course. Some tanks and SP guns also belonged to the course. The entraining observed on 3 June 1953 included troops of the 1st Mecz Div which moved to Forst Zinna on the troop train troops unloaded on 4 June 1953 were artillery elements belonging to the 19th Mecz Div of the 1st Mecz Div from Jueterbog. The unloading was previously reported
