25X1

1. The engines previously reported (sic) as being produced at the Puck shipyard are destined for landing craft. The engines are packed in cases and dispatched from Puck (Q 55/Y36) by rail westward (not in the direction of Gdynia). There are no markings on the cases. They are consigned in lots of 5 and 6, sometimes less, at approximately fortnightly intervals. Each case weighs approximately 1,000 kg.
2. The shipyard has four small assembly shops, and a large new shop is under construction.
