25X1 [redacted] Comment. For breakdown of the supply installations involved and information on their location [redacted]

25X1 [redacted] Comment. The supply goods dispatched to the GORC motor vehicle spare parts and tire depot were only partially covered in March and April. Incoming goods observed in May were above the monthly average. This was due to heavy shipments of sawn timber. Outgoing shipments were normal. As usually, they were almost exclusively consigned to large GORC and army motor vehicle repair shops.

25X1 [redacted] Comment. Prior to early May 1953, a KVP ordnance school and ordnance shop were located in Doberlug-Kirchhain. It is credible that Soviet weapons were dispatched to this installation.

25X1 [redacted] Comment. Outgoing shipments observed in April and May were above the normal level. It is believed that shipments consigned to KVP units were increased.

25X1 [redacted] Comment. Undoubtedly river crossing equipment for the engineer depot of the GORC. [redacted]

25X1 [redacted] Comment. As compared with the previous months, the volume of incoming shipments decreased considerably. It is believed that the depot is now adequately stocked with river crossing equipment. Outgoing shipments were on the usual level.

25X1 [redacted] Comment. The turnover at this medical depot of the GORC was normal.

25X1 [redacted] Comment. Trofimov was mentioned for the first time. Rail traffic observed at the two depots involved was normal.

25X1 [redacted] Comment. This shipment was mentioned previously. [redacted]

25X1 [redacted] Comment. Incoming and outgoing shipments of this GORC signal depot were at about the same level as observed during the preceding months.

25X1 [redacted]
