SUBJECT

Development of Goniometer Direction Finder
at Funkwerk Koepenick

25X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSES OF THE UNITED STATES WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794 OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The blueprints for goniometer direction finder I (Goniometerpeiler I) have been completed at Department TEE of Funkwerk Koepenick. The direction finder is so designed that it can be used with any commercial receiver of the all-wave type. Work on individual parts of the direction finder, such as the goniometer bearing switch (Peilseitenschalter), cross frame, variometer (Enttrobungsvariometer) and scale, has begun in the workshop of Department TEE. Development of this direction finder, as well as the future development of a second, somewhat different model, are under the supervision of Engineer Hans Erler.
2. Goniometer direction finder II, to be developed later in the same department, is to be provided with an automatic device for the steering of ships. For this purpose it is to have a gyrocompass installation.
3. The goniometer and variometer cores for the above-mentioned instruments are produced by VEB Carl von Ossietzky (formerly Dralowid) in Teltow.
