1.  Comment. Possibly troop trains.

2.  Comment. Of the 36 railroad stations mentioned, 25 are compared to those mentioned . The comparison shows a slight increase of loading capacity compared to June, which increase was definitely due to the summer training. Omitting the number of possible troop trains, there were 406 cars loaded with military goods in RSD Erfurt in July compared to 459 carloads in June. Since it is probable that information from this district is incomplete, it is believed that the volume of shipments loaded is almost as high as that of the preceding month.
