1. About 10 July 1954 the munitions plant at Margineanu, near Floesti, began producing small caliber artillery weapons. The daily production around the middle of July 1954 was 700 to 750 weapons. For lack of raw materials there are often interruptions in production.
2. Future plans call for the production of guns of 122 mm, 152 mm, and 203 mm caliber.
