## REFERENCES

This is UNEVALUATED Information

1. The Main Administration for Liquid Fuel in Production Area Chemistry of the Ministry for Heavy Industry has issued a regulation to the effect that no part of the excess profit made above and beyond the Plan by any of its enterprises may be transferred to the Director Funds of the enterprise if the production of the enterprise is short of the Plan in even one of its main products or in the so-called bulk consumer goods. Previously, every enterprise which had a production in excess of the Production Plan could transfer 60% of the excess profit (after the Profit Plan was adjusted to the increased production) to the Director Funds. Under the new regulation this transfer is made impossible if one of the two above-cited conditions is given even though the enterprise manages to overfulfill the Plan. In addition, the Main Administration for Liquid Fuels stipulated that the transfer of 3% and of 1% of the total amount paid for wages and salaries can be transferred to the Director Funds I and II of the enterprise in question only after special application to and approval through the Main Administration. Thus far, the cited portions of the total paid for wages and salaries have been automatically transferred to the Director Funds by every enterprise which showed a profit.

2. These measures of the Main Administration for Liquid Fuels, which apply to 1955 production, have created great dissatisfaction among the managements of the enterprises under its jurisdiction and also among their workers because part of the money accumulated in the Director Funds was used for the social care of workers.
