COUNTRY	Rumania	REPORT	
SUBJECT	The Targanu Fuel Depot	DATE DISTR.	18 July 1955
DATE OF INFO.		NO. OF PAGES	1
PLACE ACQUIRED		REQUIREMENT NO.	RD
DATE ACQUIRED		REFERENCES	

25X1

This is UNEVALUATED

SOURCE EVALUATIONS ARE DEFINITIVE INFORMATION

1. The Targanu fuel depot is located in the woods at Cernica, five kilometers east of the railroad which encircles Bucharest, and one kilometer north of Targanu. A spur track two kilometers long leads to the depot from Cernica. The depot covers an area 400 by 600 meters and is surrounded by barbed wire. Trees have been cleared away along the barbed wire fence, but unobtrusively, so that it is not noticeable. Wooden watchtowers equipped with revolving lights and five meters high, are located at each corner of the area.
2. The Targanu depot is under the jurisdiction of the Rumanian Air Force and is comprised of the following installations:
  - a. 32 underground tanks. Each tank is 3.5 meters in diameter and 7 to 8 meters deep. They are covered with sandbags and piles of gravel. Pipes lead into the tanks through the gravel. Rubber hoses can be attached to the pipes. The fuel pipe network leads to the pumping station which is near the loading ramp. The pumping station has four automatic pumps operated by gasoline engines.
  - b. A single-story brick barracks and guardroom.
  - c. A two-story building, 15 by 25 meters, in which depot personnel are quartered.
3. Forty percent of the fuel in the depot is jet fuel, 40 percent ethyl gasoline, and 20 percent is motor vehicle gasoline, called "blue gasoline" by the Rumanians.
