PLACE ACQUIRED		REQUIREMENT NO.	RD 25X1
DATE ACQUIRED		REFERENCES	This is UNEVALUATED Information
SOURCE EVALUATIONS ARE DEFINITIVE.		APPRAISAL OF CONTENT IS TENTATIVE.	

25X1

1. The Tanganu ammunition depot is located eight kilometers east of the railroad line that encircles Bucharest and on the Bucharest-Oltenita railroad, 1,400 meters north of the Tanganu railroad station. There is no spur track to the ammunition depot but there is a highway which branches north from the road connecting Tanganu and the railroad station. The installation covers an area of 400 by 200 meters and is surrounded by barbed wire. Around the installation are cultivated fields and scattered groves of trees. Wooden watchtowers equipped with revolving lights are located at each corner of the depot.
2. The Tanganu depot is under the jurisdiction of the Rumanian Air Force and is comprised of the following buildings:
 - a. Four underground concrete bunkers, 20 by 4 meters, with an earth cover 1.5 meters thick. They contain the following: aerial bombs in crates, including high explosive bombs; aerial mines; and incendiary bombs. A green circle on a crate indicates an aerial bomb, a red circle indicates a high explosive bomb, a white circle an aerial mine and a brown circle an incendiary bomb.
 - b. Six sunken brick barracks covered with tarpaper, 15 by 8 meters, with a three meter earth bank. They contain rockets, tracer shells, armor piercing shells and incendiary shells.
 - c. Two isolated concrete storage rooms, 10 by 10 meters, above ground and surrounded by an earth embankment. They contain fuses for aerial bombs and signal rockets which are easily set off.
 - d. A two-story guardhouse, 20 by 8 meters.
