1. Comment. Major fuel deliveries (jet fuel ?) from the USSR. Most of the fuel was dispatched to airfields and fuel depots of the Twenty-Fourth Air Army. Noteworthy are the fuel shipments to the state reserve depot at Adlershof which has a storage capacity of 25,000 cubic meters. 25X1
2. Comment. Possibly rations delivered to the Soviet ration supply depot in Frankfurt/Oder. 25X1
3. Comment. Exports of GDR automobile plants to Red China and the USSR. If the two shipments observed on 11 June were really dispatched from Brandenburg and Werder as stated, it might be assumed that the trucks were deactivated equipment sent within the framework of the Soviet motor vehicle replacement program to Red China. No automobile plants are located at Brandenburg and Werder, but the two places have previously been observed as assembly points for motor vehicles to be handled within the framework of the motor vehicle replacement program. 25X1
4. Comment. Shipments to the USSR from the uranium ore mining district in Saxony. The monthly quota of uranium ore shipments is 10,000 to 11,000 tons. 25X1
5. Comment. Ammunition deliveries to Soviet ammunition depots and empty ammunition boxes returned to the USSR. 25X1
6. Comment. Possibly sdvents delivered to the hydrogenation plant in Boehlen. 25X1

1. Comment. Major fuel deliveries (jet fuel ?) from the USSR. Most of the fuel was dispatched to airfields and fuel depots of the Twenty-Fourth Air Army. Noteworthy are the fuel shipments to the state reserve depot at Adlershof which has a storage capacity of 25,000 cubic meters. 25X1
2. Comment. Possibly rations delivered to the Soviet ration supply depot in Frankfurt/Oder.
3. Comment. Exports of GDR automobile plants to Red China and the USSR. If the two shipments observed on 11 June were really dispatched from Brandenburg and Werder as stated, it might be assumed that the trucks were deactivated equipment sent within the framework of the Soviet motor vehicle replacement program to Red China. No automobile plants are located at Brandenburg and Werder, but the two places have previously been observed as assembly points for motor vehicles to be handled within the framework of the motor vehicle replacement program. 25X1
4. Comment. Shipments to the USSR from the uranium ore mining district in Saxony. The monthly quota of uranium ore shipments is 10,000 to 11,000 tons. 25X1
5. Comment. Ammunition deliveries to Soviet ammunition depots and empty ammunition boxes returned to the USSR.
6. Comment. Possibly solvents delivered to the hydrogenation plant in Boehlen. 25X1

7. Comment. Crude oil deliveries from the USSR to GDR hydrogenation plants and returning empty tank cars.

8. Comment. Unusually heavy deliveries of aircraft of an undetermined type to airfields of the Twenty-Fourth Air Army. The shipments to Kummerow were probably consigned to Jueterbog airfield.

25X1

9. Comment. Incoming and outgoing motor vehicle shipments within the framework of the current replacement program. The shipments to Cottbus might have been consigned to a KVP/Air unit.

10. Comment. Presumably tank spare parts bound for the Muellrose depot.

11. Comment. This shipment with an undetermined content might possibly have been bound for Tutow airfield which is under construction.

25X1

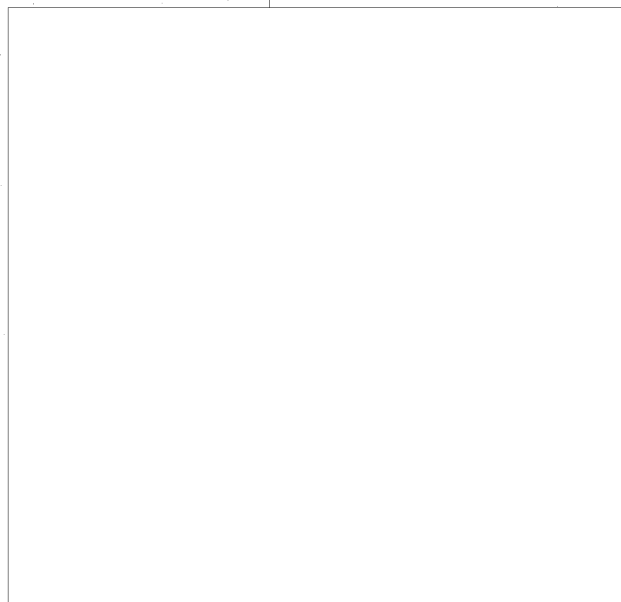

12. Comment. This shipment probably contained armored personnel carriers.

13. Comment. The incoming shipment of T-54 tanks is probably identical with the following shipments: shipment on 19 June [redacted] shipment on 29 June [redacted] bound for Altruppin; and shipments on 22 June [redacted]

14. Comment. Rations delivered to the GSPG ration supply depots in Frankfurt/Oder and Satz Korn.
