PAGES 1 ENCLOSURES (NO. & TYPE) \_\_\_\_\_REMARKS This is UNEVALUATED Information

A large fuel-storage unit is scheduled to be constructed in the Wismar harbor as soon as possible. Seehafen Wismar (VEB) is in charge of the construction management. The pipe systems and fuel containers will be delivered by various firms. The construction work is to be hurried so that makeshift 25X1 refueling will be possible in late 1955, and diesel ships entering and leaving the harbor can be refueled. Wismar harbor is the only harbor of the GDR which can be **used** by ships with a draught of up to 10 meters.
