As requested in your memorandum of May 18, 1962, we enclose the workpapers for job number 5497. As all of the information we have is in these workpapers we do not believe it necessary for anyone from the regional office to participate in the Washington discussion.

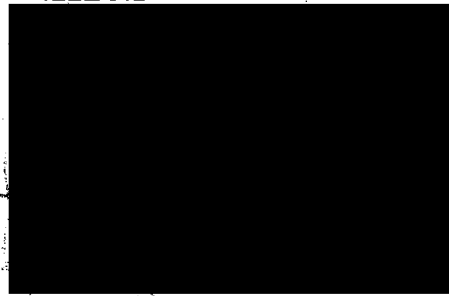

While this particular contract, or job, is relatively small we believe it can be used to demonstrate the necessity for Washington and the field deciding how contracts and subcontracts of this nature should be reviewed. If we can be of any assistance please let us know.
