Chief of Station, [redacted]
ATTN: Station Comptroller

~~CONFIDENTIAL~~

Deputy Comptroller

Accrued Costs

Information

25X1A6c

[redacted] dated 11 March 1960

The proposals contained in reference for accruing field station costs are receiving consideration at headquarters. While paragraph 3 of reference indicates that some concessions to practicability have been made in developing the proposed accrual procedure presented, we are nevertheless concerned with the workload impact on such stations based on the proposals contained in reference. In view of the contemplated return of [redacted] to headquarters in the near future, this subject will be held for further discussions with him here. The careful and painstaking analyses made by the Station of the many cost factors involved in this problem, as evidenced by reference, is greatly appreciated.
