## OFFICE OF THE DIRECTOR

Action Memorandum No. A-257

Date 21 June 1963

TO : Deputy Director/Research

SUBJECT : Passes over the United States by Soviet Satellites

REFERENCE:

Will you undertake a detailed study of the passes which have been made over the United States by Soviet space vehicles, both manned and unmanned. Will you also undertake to maintain this on a current basis and keep the DCI advised of the status.

MEMORANDUM FOR: General Carter  
Mr. Kirkpatrick

6/20/63

Mr. McCone requests on an urgent basis a detailed study of the number of passes by Soviet COSMOS vehicles and Soviet astronauts over the U.S. This is to be a detailed study which is to be maintained on a continuing current basis.

MEMORANDUM FOR: Director of Central Intelligence  
SUBJECT: Passes Over the United States by Soviet Satellites  
REFERENCE: Your action memorandum A-257, same subject,  
dated 21 June 1963

1. This memorandum is in response to your request in the reference.  
2. A detailed study has been made of the total number of passes over the United States by all Soviet satellites, beginning with Sputnik 1 and covering all passes up to 30 June 1963. This figure came to 25X1 [ ] passes, and did not include passes over the United States by the payloads of interplanetary and lunar probes which remained in earth orbit, following an unsuccessful attempt to eject out of parking orbit. A breakdown of this total by individual satellites is included in Appendix A.

25X1 3. The grand total amount is somewhat unrealistic, in that it includes [ ] passes by Sputniks 1, 2, and 3. The details of the payload of these three vehicles were well publicized, and unquestionably they had no reconnaissance mission. The manned Vostok vehicles and the series of unmanned Vostok vehicles preceding the first manned launching were less publicized with regard to their payload. This group produced

25X1 [ ] crossings of the United States, a number which increases to [ ] 25X1 if the crossings of Sputnik 4 are counted after its ejection into a

higher orbit, as the result of an unsuccessful deorbit attempt.

25X1

4. The Cosmos series of launchings provides the most fertile area for rebuttal against any claims against U.S. reconnaissance satellites.

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Strategic Significance of the Soviet Cosmos Series

1. This memorandum is for information in response to your request.
2. Since 16 March 1962, the Soviets have fired eighteen consecutive successful earth satellites in their 'Cosmos' series (see attachment). The Soviet press reports treat these launches as a single program for the collection of scientific data.
