Lieutenant General John A. Sanford, USAF
Director, National Security Agency
Fort George G. Meade, Maryland

Dear General Sanford:

Reference is made to your letter, Serial H-0420, dated 27 January 1958, accepting CIA's offer to assign an analyst to part-time duty with the CIA Liaison Office at Fort Meade. If it is agreeable with you and members of your staff, will be assigned to this duty on or about the 14th of March.

25X1

This Agency, in order to accomplish its required mission, is in great need of frequency usage and related materials that are available in NSA. Your consideration and cooperation in making it possible to arrange for an effective exchange of the required data as mentioned in your letter are sincerely appreciated.

Sincerely yours,

Allen W. Dulles
Director

The Honorable Allen W. Dulles
Director, Central Intelligence Agency
2430 E Street, N. W.
Washington 25, D. C.

Dear Mr. Dulles:

Reference is made to CIA memorandum, Serial ER 9-9629,
Subject: Frequency Usage, dated 23 December 1957, wherein it
is stated it would not be advantageous at this time for you
to relocate the frequency usage file at NSA.

This Agency will be most pleased to accept your offer
to assign an analyst to part-time duty with the CIA Liaison
Office at Fort Meade. It should be possible at that time to
arrange for an effective exchange of the required data.

Sincerely,

JOHN A. SAMFORD
Lieutenant General, USAF
Director

MEMORANDUM FOR: Director, National Security Agency

SUBJECT: Frequency Usage

- REFERENCES:**
- (a) Memorandum from Acting DCI to Director, NSA, dated 31 December 1956
 - (b) Memorandum from Chief, Office of Collection Production, NSA, to DCI, dated 28 March 1957

1. [redacted] was assigned duty with NSA during the period April through June 1957, for purposes outlined in paragraph 4 of CIA memorandum dated 31 December 1956. I wish to express my sincere appreciation for the courtesy and cooperation extended [redacted]. Forwarded herewith is a copy of the report on his special assignment.

2. Having reviewed the findings and explored the matter with members of my staff, I am forced to conclude that, at least for the present, it would not be advantageous to CIA to relocate its frequency usage unit at Fort Meade.

3. The basis for this conclusion may be summarized as follows:

[redacted]

25X1

b. The only advantage that perhaps could not be attained through means short of relocation would appear to be CIA use of NSA Electronic Data Processing Machine (EDPM) equipment. In our opinion total reliance on NSA Machine Processing Section facilities would not satisfy the needs of CIA. To perform its mission with required timeliness and efficiency the CIA unit must have a closely associated machine facility. A centralized facility, even though EDPM equipment is used, would not have the flexibility to perform, immediately on demand, the wide variety of processing and tabulating functions currently required.

3. As an alternative to collocation, CIA proposes that a closer liaison be established between Communications Analysts within the various components of NSA and the Radio Stations Branch, CIA, to ensure a more rapid, complete, and direct exchange of information. We are prepared to assign an analyst to part-time duty with the CIA Liaison Officer at Fort Meade to establish and maintain this relationship.

ALLEN W. DULLES
Director
