Amendment 7

Dear George:

In consequence of technical meetings held recently with your representatives, a modification has resulted with respect to concepts underlying System 4 operations. In your telephone conversation with Burt this morning you indicated that Dick approves of the modifications involved and that we should proceed, therefore, to include the modifications necessary in our proposal covering the development of System No. 4.

In effect, these changes result in an extension of the study program and preliminary development program previously authorized, and indicate the need for additional funds to cover the extension in study now required. Accordingly, we should like to request the allocation of an additional [redacted] plus fee to cover these activities from the date of expiration of the funds made available earlier until 15 April 1956, it being anticipated that a complete proposal covering development of the modified system will be in your hands at a date sufficiently early to provide you the opportunity of approving by that date the over-all System No. 4 program.

Sincerely,

Dean
