MEMORANDUM FOR: HQ, USAF
AFCIG-5

ATTENTION : Lt. Colonel Robert Honeywell

SUBJECT : Removal of MG-13 Fire Control System from
F-101B Aircraft

1. It is requested that the F-101B aircraft scheduled for Detachment 1, 1129th Special Activities Squadron, have the MG-13 fire control and data link systems removed prior to delivery. Inasmuch as we have no requirement for this equipment, the detachment will have no radar maintenance personnel nor test equipment assigned to maintain it.

2. It is recommended that this work be accomplished at the Ogden AMA and that the items be retained under their control until the F-101's are returned to USAF. The MG-13 system as detailed in T.O. 1F101B-2-15 should be completely removed with exception of the racks and boxes 155, 255, 355 and 755 which should remain in the cockpit.

3. The four data link black boxes should be removed but the two controls and four indicators can remain in the cockpit. This equipment removal will cause about a 2,000 pound weight reduction which in turn will necessitate a re-evaluation of the weight and balance of the aircraft.

4. Request we be advised of action taken.

USAF review(s) completed.
