

OSA-4412-63

13 August 1963

MEMORANDUM FOR: Assistant Director, OSA

SUBJECT : Article in 12 August 1963 Issue of
The Wall Street Journal

1. Attached is a copy of an article appearing in the 12 August 1963 issue of The Wall Street Journal. The only portion of interest is that outlined in red.

2. It is the opinion of SS/OSA that this article is not compromising, since it merely speculates about four types of aircraft which Air Force planners feel are required for defensive warfare, but which are futuristic concepts at this point. The paragraph outlined in red does, in fact, describe to some extent the R-12. However, it could just as easily be interpreted as a reference to the RX, which is openly being considered as a future development by the Defense Department, and for which requests for proposal have been submitted to several aircraft manufacturers. In essence, it merely describes an aircraft that many people have been recommending, ostensibly without success, for several years.
