25X1 22. [redacted] LIAISON In connection with a request
25X1 from Representative Hamilton Fish's (R., N.Y.) office directly to
[redacted] NFAC, asking him to address a women's group from
Poughkeepsie on Tuesday at the Cannon Caucus Room and upon discovering
that this would be a solo performance, I contacted Brian Atwood, Congressional
Relations, Department of State, who said he would make arrangements for
a State officer to address the group also. I then went by Mr. Fish's office
and spoke to Marian Clow and explained why a representative of the CIA
was not in a position to handle the policy type questions relating to Africa
which would most likely arise among a group of some 108 individuals. I
referred to the arrangements which I had made with State Department for
a joint appearance. Clow was sympathetic to our concern and said if it
would help she had a conflict in scheduling and would substitute a
Congresswoman for our presentation. I thanked her, making clear our
willingness to participate under other than a solo condition. Later in the
evening, Mr. Fish called me, was most appreciative of the arrangements
I had made with State and said he fully understood our problems and said
25X1 he thought of [redacted] because of [redacted] participation in a
25X1 Brookings' Seminar in which the Congressman participated. Our
conversation drifted to someone else who might participate with State
and Mr. Fish asked if I could make contact with DOD to see if they would
be willing to send a representative. This I did through Col. Grant Miller,
Congressional Affairs, and arrangements were made.

25X1 23. [redacted] LIAISON Mike O'Neil, Counsel,
House Permanent Select Committee on Intelligence, called and asked
if I could supply a letter for the record on the chronology of the request
[redacted]
25X1 will follow-up on this.

25X1 24. [redacted] LIAISON Met with Representative
Robert McClory (R., Ill.) and thanked him for his willingness to make
himself available as a prosecution witness in the Snapp case. I said
I knew the Director was most appreciative of his assistance and would
no doubt be contacting him directly to thank him.
