Review of Draft of Annual Report

1. Discussion: In response to a request of the Executive Secretary of the EIC, the officers of the Subcommittee prepared a draft of the annual report to the EIC from the Subcommittee on minerals and metals. This draft was distributed to the Subcommittee members prior to the meeting to solicit their comments and additions, if any.

The representatives of the Air Force and CIA/OSI were unable to attend the meeting but discussed the draft annual report and the review of the status of priority deficiencies with the Subcommittee officers prior to the meeting.

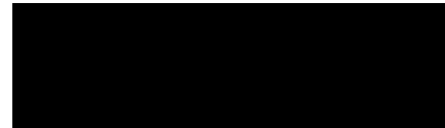

The State Department representative inquired regarding the acquisition of certain intelligence materials which are available in CIA/RR but as yet unpublished. The Chairman stated that these could be made available to members on an informal basis in bilateral or multilateral discussions or, if a written report were desired, upon receipt of a formal request.

2. Action: The Subcommittee approved, with minor changes and additions, the draft of the annual report (attached). The Air Force and CIA/OSI representatives had concurred in the report prior to the meeting.
