CENTRAL INTELLIGENCE GROUP

sixty percent of the lacquer produced goes directly for reparations to Russia, and forty percent is used for other reparations orders in the Russian Zone Instances of this are the allotment of varnish to BMW Eisenach for varishing of cars, and the varnishing of tin preserving cans by Franz Pillnay, Dresden, a Land-owned establishment, and to Karl Hans Blume, Magdeburg.

6. The textile aids go practically exclusively to indirect sparations to the Red Army, such as uniform materials and tarpaulins.

7. Metal hose is used almost exclusively on repair work. At the moment, however, there is an important special contract to manufacture special metal hose for the apparatus being used to raise the German warships sunl in the Baltic. The hose is made of V-2A steel.

8. There are 200 men working in the factory. The manager is Walter Harksann, former cooper and laboratory assistant. The chief chemist is Dr. Kurt Sändig, who is unlikely to be deported, owing to illness. The technical plast manager is Dipl. Ing. Alexander Amburger, a "Volga German". Se speaks per set Aussian and French, and interprets at important meetings V. A Soviet Department representatives. The sales manager is one Werner Falk, a former "Parteigenosse".

9. Soviet control is only exercised in as much as the firm has to report every ten days to Lt. Colonel Pilecki on production and sales. These must be in accordance with the delivery planilaid down. Deliveries to firms not included in the "Pilecki Flan" are forbidden. Pilecki has twice carried out a personal check.

10. Because of the lack of the necessary oils for technical purgoses, the Russians have taken from the stock belonging to the Food Section. Agreement was reached between the two Sections on this point.
