25X1

In many instances the number of persons employed in the factories [Redacted] appear to be very small, if the factories' annual capacity and capital are taken into consideration. However, it is to be assumed that, in most cases, these factories were not operating at maximum capacity on 1 October 1946 [Redacted]

25X1

Section I contains information on the factories in Sinuiju City. In the other sections the factories are arranged according to the "gun" (郡) (counties) in North Pyongan Province.

25X1

In the original document, pages 9, 13, 15, 36 and 40 are missing. From their position in the document it is probable that these missing pages contain information on additional factories in Sinuiju City and Uiju (Gishu), Pakch'on (Hakusen) and Chongju (Teishu) Counties. It is also probable that one of the missing pages contains information on factories in Chasong (Jijo) County, which is the only county in North Pyongan Province not included in this report.

25X1

For the romanization of factory names and personal names in this report the McCune-Reischauer system of romanization has been used; for the romanization of place names the romanization system used in the September 1944 edition of War Department's Gazetteer to Maps of Korea has been followed as closely as possible.)
