DATE OF IND. 25X1X	SUPPLEMENT TO REPORT NO.

- On 14 July 1948, an engineer from the Soviet Ministry of Shipbuilding unit (MSF) in Berlin-Köpenick visited Askania-Berlin to request aid in carrying out MSP's ships' boiler program which had been suspended, partly because of the loss of some personnel. Boiler plans for destroyer types 22 and 43 have been completed, but only those of the Deschimag Bremen, System Wagner, are to be built. The La Mont plans have been discarded.
- 2. All MSP sections have been reduced, but no deportations of personnel have occurred. Nork in the torpedo section has been held up by the dismissal of specialists for security reasons. Among the Russians still at MSP are Beliakov and Selivanov, and Malov has been assigned to carry on Statesny's work.

25X1A

Comment: Selivanov has not been identified. Beliakov is in the Davidov torpedo section and Malov is with the Borissov shipbuilding unit. The reference to Statesny suggests that he may still be in the USSR.
