| 1. | The f | firm Schaeffer & Bud er, Other firms bel | enberg, belong onging to "Pr | s to the SAG lbor" are: | "Pribor" and is it | largest |
| | a. Steinle & Hartung, Quedlinkurg, producing pressure regulators. | | | | | |
| | b. M. Kober & Co., Suhl, producing small electric motors, e.g. for electric razors. | | | | | |
| | e. I | ouis Schopper, Leips aschinen). | sig, producing | tension tea | ting machines (Zerre |)185 - |
| | d. Siemens & Halske, Chemnitz, producing electrical measuring instruments, switchboard instruments, watt meters and measuring bridges. e. Siemens & Halske, Zwönitz, producing cathode-oscillographs, cardiographs and loop oscillographs. | | | | | |
| | | | | | | |
| | f. S | achsenwerk in Radebe | rg, producing | large elect | ro-motors. | |
| | | | | | | 00 |
| | g. Spritz & Pressgiesserei, Heidenau, producing zinc and aluminum dies. Until recently Schaeffer & Budenberg manufactured all high-pressure equipment and pressure gauges. This production has now been crimpled by shortage of raw materials, especially nickel-chromium-steel. As a substitute, manganese steel is being used, of which there is some old stock still available, but no special process of steel hardening is employed. Improved processes of rolling or of continuous work-hardening are not applied. | | | | | |
| 3. | The firm can now only produce manometers for pressures of not more than 4,000 atm and has had to switch part of its productive capacity to the manufacture of such electrical instruments as: | | | | | |
| | | oparatus for hot stee | | 3 liquids (re | troleum) | |

CONFIDENTIALS ONLY

CENTRAL INTELLIGENCE AGENCY

50X1-HUM

- c. Single-point recorders for thermo-elements.
- d. Single-point recorders for resistance thermometers.
- e. Triple recorders for thermo-elements and resistance thermometers.
- f. Frofile measuring apparatus for thermo-elements, according to DIN.
- g. Single switchboard instruments with sinter magnets.
- h. Temperature regulators with flexible reconductor.
- 1. Menometers of all types up to 4,000 atm of normal design as per catalogue.

Of the 5,000 employees at Schaeffer & Budenberg, 1,700 are engaged in the manufacture of such electric measurement apparatus.

4. Experiments in equipment for [pressures higher than 4,000 atm are officially prohibited; e.g. the German Weights & Measures Bureau had recently ordered a pressure meter (Druckwage) up to 8,000 atm, but the Russians refused to grant permission for one exceeding 4,000 atm.

CONFIDENTIAL SECRET/CONTROL - U.S. OFFICIALS ONLY
