25X1A	(0)	that the locomptives parked at Oberschoeneweide are not a "column reserve" but a reserve to be formed for the coming winter operations has been confirmed by this observation. See	25X1A 25X1A
	(2) (3)	The 25 locomotives observed in Luebben probably are the locomotives of deactivated locomotive Column No 9 in Cottbus. The locomotives are believed to have been on route to their collection point at Uckro.	
25X1A	(4) (5)	See The reserves to be formed for the winter of 1950/1951 are probably concerned. Each regional railroad directorate was assigned a specific quota for this reserve. See It is believed that these locomotives are part of the locomotive reserve of the Directorate General. This reserve was to be established for	25X1A
		Soviet purposes by 1 October 1950. See	25X1A
