	The north-south boundary is at present approximately 1500 yards in length. It runs parallel to the main Sudapest-Miskole railroad line, and approximately 200 yards to the east of the track. The whole area is thickly wooded, and effectively canouflages the building operations. The brick foundations of four or five large buildings could be seen through the trees. Construction on one building had progressed as far as the second story. Huge dumps of building material were visible. At the northern end of the factory area it appears underground excavations are taking place. Continuous mounds of earth 15 to 20 feet high and approximately 350-400 yards in length could be seen.

2.	The brick foundations of four or five large building the trees. Construction on one building had progrestory. Huge dumps of building material were visible the factory area it appears underground excavations tinuous mounds of earth 15 to 20 feet high and appr	essed as far as the ie. At the norther are taking place. commately 350-400 is been built to this at a point approxi- banked 3 - 4 feet a concrete sleepers line, which is pr red for this new pr	e second on end of . Con- yards in is factory imately above s. A resumably roject. rebuilt.
	The brick foundations of four or five large building the trees. Construction on one building had progress story. Huge dumps of building material were visible the factory area it appears underground excavations tinuous mounds of earth 15 to 20 feet high and apprend length could be seen. A new standard-gauge single-branch railway line has area. It leads off the main Budapest-Miskole line limites north of Isaszeg station. The railbed is the level of the ground, and the tracks are laid on marrow-gauge track lies parallel to this new branch used for transporting the building materials requir Isaszeg railroad station appears to be undergoing r	essed as far as the le. At the norther are taking place. commately 350-400 s been built to this at a point approxi- banked 3 - 4 feet concrete sleepers line, which is pr read for this new pr cepairs and being r a new arrament face e have to say that	e second en end of Con- yards in is factory imately above s. A resumably roject. roject. roject. 50X1-HU ptory.
