construction of the Maly Shtifel Plant probably was not completed before the war. One section of the Moluhoy Shtifel Plant, congriding three rolling treins, as rebuilt by October 1947 and the remainder by the end of 1945. The Maly Shtifel Plant was also scheduled to be in full production by 1949. In 1949 the secondess tube production was to be increased 2.2 times and the enthre preduction 2.5 times the prewar production. This increase was to be achieved by the new folg Shtifel rolling mill installation and by increasing the efficiency of the Polshoy Shtifel Flant. The preduction of the plant included iron and steel tubes for the crude oil industry, and tall bearing tubes (Regellegerrohre). The present install production of all kinds of tubes is estimated at about 100,000 tons. Thisinov (fue) was ranger of the plant in 1952.

CENTRAL INTELLIGENCE AGENCY

Legend:

- Kolliag mill department, equipped with a karge tube rolling installation.
  A transformer station (a) and an eleministrative department (a) used also housed in this building. A single track passed through the workshop along the conthern wall.
- Rolling mill department, equipped with a take rolling installation and 6 rolling trains, several annealing furnaces, and metal saws. Three tracks passed through this workshop. An extension building (a) was being added to this rolling mill department.
- 3. Coundry. No details vere known.
- $h_{\pm}$  cas producer installation, not yet in operation in the surmer of 1960.
  - a. The coal storage bins, each 25 motors in disactor one 12 meters deep.
  - b. Concreted coal durp.
  - c. Conveyor tower.
  - d. Conveyor belt.
  - e. Scelve gas producers, each 3 meters in Signatur and 15 Esters block are scheduled. Four of these producers were set up in 1945. The foundations had been laid for the other 3
  - 2. Coke quenching basin.
  - g. Cas pipe line to the rolling mill department.
- 5. Transformer installation.
  - a. Pich-tension like cosing from heporosinger
  - b. Open switch install tion (.reisebalton)age
- Boilerhouse, equipted with 2 stoves and ellegadly 6 bellers, used to heat the entire plant. The heating pipe lines were laid underground.
- 7. Oil durp, comprising blanderground tasks, 12 to 15 reters in director. Two whre completed is succer 19h2, and the remaining 2 were still under construction.
- 0. Forge, To details were known.
- 9. Latheshop. No details known.
- 10. Carages.
- 11. mailroad station.
- 12. Storage dury for ingots.
- 13. Larchuses.
- The Accumistration building. The CW carp who in the same building.
- 25. Tathhouse.
- lé. Gramill.
- 17: milross tracks.
