As of 23 October 1951, there were over 3,000 underground reinforced concrete forts between Antung and Mukden. The forts were camouflaged and showed only slightly above the ground. There were 1,200 forts on the first line of defense, which was the north side of the Yalu River between Linchiang and Antung; and 2,000 forts on the second line, which ran along both sides of the Mukden-Antung railway. The area along the railway was designated a military restricted region and troops were stationed at every stop.
