CENTRAL INTELLIGENCE AGENCY

It is expected that these three areas of long range artillery will check the approach of enemy ships into the Bay of Gdansk. Other such defense areas are or will be constructed on the coastline between Darlow (Rusgenwalde) and Welin Island. 4. Between 25 and 30 October 1951, a joint Army-Navy commission, which included both Polish and Soviet officers, inspected an area of the Polish coastline near Ustka (Stolpmuende). This area commences about ten 11 APR 1957 IMMEDIATELY AFTER USE JOBSTANDED CLASSIFICATION SECRET/CONTROL - U.S. OFFICIALS ONLY STATE X NAVY X NSRB DISTRIBUTION DISTRIBUTION	* **	CLASSIFICATION	SECRET/GO	NTROL = U	S. THIS IS UNEVALUATED INFORMATION THIS IS UNEVALUATED INFORMATION THIS IS UNEVALUATED INFORMATION THIS IS UNEVALUATED INFORMATION 1. Defences in the Bay of Gdansk (Benzig) are concentrated in three main defence areas which have been planned under the direction of Admiral Berykadow. Two defence areas, that at Redicuo, between Otypita and Sopot, and they in the area near the city of Helo on the Hel Pennsada, have already been completed, but the third area, which is located east of Gdansk near Krynica Morake on the Microzia Miclana (Prische Hehrung) peninsula is ettil under construction. 2. These defence areas are all being equipped with approximately the same type of equipment, and each will be armed with Soviet 130 mm. artillery guns, placed in fortified and concealed positions, and with about twelve 80 mm, anti-irraft guns. The areas also will have underground munitions depote, electric power plants, and communications systems. The area at Redlow can only be supplied from the sea, and a new tier has been constructed for unleading equipment for the area. A small cog realroad is being laid from the plet to the almost 100 motor high cliffs which border this area of the coact, and underground tunnels have been due to the coact of the area of the coact, and underground tunnels have been due to the plet to the almost 100 motor high cliffs which border this area of the coact, and underground tunnels have been due to the plants which make up the various artillery positions, depote and power plants which make under the coact, and underground tunnels have been due to the plants which make under the plant which will be used for supplying Krynica Morake and the coact of the plants which has been due to the coact of the plants which make under the plants which make under the coact, and underground tunnels hav						, C	D NO		÷

kilometers west of Ustka and is characterized by cliffs which rise about thirty meters above the sea. The cliffs extend for about three kilometer to the west, where they come to a stop at Lake Wiecko (Vietzker See), forming a shelter for the eastern sector of the lake and protecting it fobservation from the Baltic Sea. The land between the coastal elevation the lake is forested. The land between the coastal elevation in the area from Szczecin (Stettin), and was joined by Marshal Rokossows and unnamed Soviet generals for one day during its examination of the result is expected that coastal artillery emplacements will be constructed in this region, but no work has yet been started here.	rom n and rived ski egion.
A unit of about 800 Polish paratroopers is quartered in former German barracks in a small forest near Gdansk-Brzezno. It is thought that this unit has been newly organized. Men are trained in jumping techniques for a fifteen meter high tower which is located in the area.	3 om
