SUPPLEMENT TO
REPORT NO.

25X1X

1. There is a wolfram mine at Tinh Tuc (105-51; 22-39), 46 kilometers from Cao Bang (106-15; 22-40). There are more than 10,000 miners working at Tinh Tuc, most of whom are local inhabitants. Each month, three or four convoys consisting of 70 to 80 GMC or Molotova trucks transport the wolfram ore to China.
2. At Cam Duong (104-01; 22-24), five kilometers southeast of Lao Kay (103-58; 22-30), approximately 10,000 miners are extracting "tritate de phosphore" (sic). Most of the miners are inhabitants of the mountains. Ore from this mine is shipped by river to Phu Doan (105-12; 21-37) via Phu Yen Binh (104-58; 21-48) and is then transferred to Chinese trucks for transport to China.
3. Both of the above mines are being exploited by Chinese Communist engineers and the Chinese Communists pay all expenses.
