- (2) Although it was known that the barracks installation in Lowicz was occupied by boviet troops, there was no possibility to identify the unit concerned at the reports received were conflicting. In spite of the red-bordered black sorvice color seen, it is likely that a signal unit in charge of the telephone trunk line between Borlin and Hoscow is concerned.
- (3) Frobably draftees of the 1931 or 1932 class. Personnel was also inducted in spring during the preceding years.
  (b)
- 25X1
- (5) source believed that the installation mentioned is the Sklenski Barracia which, in april 1951, reportedly housed a Polish ordnance and munitions depote
- (6) Hilitis personnel wear a bluish-grey uniform. The installation probably housed an army unit or KBJ unit. Only one installation north of the railroad station which, in August 1951, was occupied by a achool for propaganda and political indepetrimation had been identified in desola, See
