Approved For Release 2006/08/08 : CIA-RDP82-00457R013200400006-9

Approved For Release 2006/08/08 : CIA-RDP82-00457R013200400006-9 25X1 STARLT/CONTROL/US OFFICIALS ONLY ~ 2 · 25X1 6, On 17 June, the north camp was occupied by between 300 and 1,000 soldiers wearing red-bordered black epaulets with artillery insignia. Four 76.2-ma field guns were seen through the open gate. were seen leaving the Trucks 25X1 installation. Service of the piece drill was performed on eight 85-mm AT guns in the terrain opposite of the installation. One officer and eight men were with each gun, \* Petween 30 and 35 guns were parked at the gun parking area field howitzers and 222-mm field guns. 25X1 7. 25X1 25X1 25X1 there were still other types of guns, Lore than 150 trucks, 25X1 were seen in the southwestern section of the 25X1 all'ea -8. Between 30 and 100 trucks, arranged in three rows one behind the other, were seen at the filling station of the amunition depot. Two men stood on either side of each vehicle, probably for an inspection. Individual firing of guns of various calibers was heard from the training area during the period from 8 a.m. to 4 p.m. on 17 June. Four trucks, each occupied by 12 soldiers wearing red-bordered black epaulets and towing 57-mm AT guns, came from the direction of fross Luebars at 4 p.m. They proceeded to the garages and the ropair shop 25X1 25X1 , Lotor vehicles seen in the area of Altengrabow 25X1 25X1 长长 25X1 Comment. It is believed that the north section of the north camp is still occupied by units of the bith (?) Army Arty Brig. It appears plausible that the south section is still occupied by rear details of the corps artillery brigade of the LXXIX Mtz Aifle Corps which moved to dostock and there is a possibility that upon completion of the training period the brigade may return. 25X1 Comment. It is believed that the troops stationed at the Altengrabow 25X1 troop training grounds were engaged in normal training activity including individual and battery firing until mid-June 1952. The construction sites would become athletic fields possibly were airfields 25X1 for observation and artilleny aircraft, further 7<sub>to</sub>25X1 ¥., determine the the 3 km some around the troop braining grounds is an 25% addition to the training area or only a restricted zone. the occupation up to mid-June 1952, with a few 25X1 exceptions, corresponds with information supplied Late May 1952. It is believed that units of the 34th arty Div (US), units of the 6th Arty Div, including the 65th Nort Brig (US), units of the Army AT Arty Brig and the With (?) Army Arty Prig of the Third Shock Army, 25X1 units of the 43d (3ds) Army Arty Brig and the 136th 6ds Hy Tank SP degt of the Third Shock Army were concerned,
