**SOURCE**

1. The following three new munitions plants in Rumania have started production:
  - a. One plant is near Floesti, producing automatic pistols and light machine guns. Reportedly, this plant has 3,600 workers.
  - b. An arms plant is located in the village of Nucet, near Targoviste, and reportedly employs 1,600 men.
  - c. The most important factory is at Fagaras. It makes bombs for the Rumanian Air Force. It operates twenty four hours per day. Reportedly, 16,000 workers are employed at this plant.
2. All these factories are controlled by Soviet engineers and are protected by the Securitate units. The factory areas are treated as military zones. Any movement in these regions must be approved by the authorities and then further approved by a Soviet commissar. Other military regions of this sort are Stalin (Brasov), Craiova and Timisoara.
