1. On 1 April 1952 work began on a new, reinforced concrete road across the Oder, 500 meters upstream from the main railroad bridge in Frankfurt. Target date for completion is 1 October 1953.
 2. When completed, ~~the bridge~~ will be 550 meters in length and will consist of 13 spans; ~~the central span~~ will be 80 meters in width. A new road is to be built from the east end through Poland to connect with the Brest Litovsk - Smolensk highway.
 3. In early May the caissons were being sunk in the bed of the river. Subsequently progress was delayed by a shortage of wooden planking to be used in supporting the concrete molds.
