[REDACTED]

of time spent on programming would not be off-set by the time saved by the P.I. using the new system.

25X1D

25X1A

[REDACTED] therefore proposed an alternative procedure that would not require such extensive programming. He suggested that the material be cut by frame and put into flat folders (one can per folder). These folders of cut frames would then be rotated in the same way that cans are now rotated. This would eliminate the necessity of mounting, cutting and taping now done by each analyst looking at a frame.

The division chiefs were asked to get their analysts views of this proposal and report to [REDACTED].

ALTERNATIVE METHODS FOR FILM DISTRIBUTION

25X1A

[REDACTED] reported on the EXSUBCOM discussion of the alternate proposals for materials delivery in order to speed up priority two deliveries to customers.

25X1A

[REDACTED] Members were also asked to consider whether they want to continue to receive complex coverage or would rather have area coverage. [REDACTED] requested an IAS response in about two weeks.
