ENGINEERING ATTACHMENT

July Monthly Report

Bangkok Bureau

A. Non-Expendable Property Received:

None

B. Items of Engineering Interest:

1. Early in the month the 3 MHz low-pass filters in the new Delta SRMC-1X10 multicouplers were exchanged for 3 MHz high-pass filters. The 3 MHz high-pass filters can now be used in series with the 30 MHz low-pass filters thereby offering additional transient protection for the amplifier. The swap seems to be doing the job since we have had no multicoupler failures since installing the new filters.

2. Based on a suggestion given bureau assistant engineer Veera Sweangsugdi during his June TDY at Okinawa Bureau, all Extel ASR keyboards were modified early in the month to facilitate teletyping adherence to MIDAS keying procedures. The same modification--involving moving the blank key to the unused bell key--was later recommended for all bureaus by FEB/ED.

3. The Shell House shop area was rearranged to provide more work space. With the conversion to Extel machines and cassette recorders two large storage cabinets that were formerly used to store teletype and IBM parts were removed and other cabinets were located, thus gaining much needed space.

4. A door was installed between two monitor booths during the month. This was necessary because of the expanded Cambodian sections's need for another booth and the unavailability of one near the existing Cambodian booths.
